

Read closely. Highlight in colour.

A calm PDF reader for research papers. Select a passage, pick a colour, and keep a note on it.

👤 You

jointly conditioning on both left
and right context

Both directions at once, not
left to right.

Swipe →

1 • HIGHLIGHT

Select a passage. Pick a colour.

Choose one of five colours or any colour you like. Add a note if you want, or just save the highlight.

BERT is designed to pre-train deep bidirectional representations by jointly conditioning on both left and right context in all layers.

jointly conditioning on both left and right context

Your note (optional). Ctrl/⌘+Enter saves.

Add as number

Cancel

Save note

2 • EDIT IN PLACE

Hover a highlight to see its note.

The note opens right under the passage. Edit it, recolour it or delete it without leaving the page.

BERT is designed to pre-train deep bidirectional representations by jointly conditioning on both left and right context in all layers.

Delete

3 • RIGHT-CLICK

Right-click it. Copy the quote.

The same actions sit in one menu: change the colour, edit or delete the note, or copy the exact passage.

BERT is designed to pre-train deep bidirectional representations by jointly conditioning on both left and right context in all layers.

-  Yellow
-  Green
-  Blue
-  Pink
-  Orange

 Delete note

4 · FIND IT AGAIN

Every note knows where it came from.

A note keeps the page and position of its passage. Click it in the side panel to jump back to the highlight.

and right context

Both directions at once, not
left to right.

5 • READ YOUR WAY

Your zoom, your theme, your panel width.

Zoom from 75% to 300%. Pick a light, dark or system theme, and the page stays white. Drag the panel's edge and it keeps that width.

Read deeper. Keep every thought. **Mark what matters.**

PaperLab runs on your own machine. Your PDFs, highlights and notes stay on your computer.
