

Ask a follow-up. Stay on the paper.

Press Follow up to ask about an answer. Each follow-up goes back to the paper, not to the answers before it.

What method do they use?

BERT masks 15% of its input tokens [C1].

C1

↳ Follow up

Is every chosen token masked?

No. 80% become a mask token [C1].

Swipe →

1 • FOLLOW UP

Press Follow up under an answer.

Your next question asks about that answer. The question box shows which one you are following.

BERT masks 15% of the input tokens and learns to predict them [C1].

C2

↳ Follow up

↳ Following: What method do they use?

Is every chosen token masked?

2 • KEEP THE THREAD

Follow-ups stay under the first question.

Each new question follows the newest answer. Press x to start a new question.

What method do they use?

BERT masks 15% of the input tokens [C1].

Is every chosen token masked?

No. 80% become a mask token [C1].

Why not mask all of them?

The mask token never shows up in fine-tuning [C1].

↳ Following: Why not mask all of them?

3 • WHAT THE MODEL READS

It checks the paper again, not its own answers.

A follow-up sends your earlier questions and the passages they used. The earlier answers are never sent.

4 · YOUR NOTES GO TOO

Your notes are sent with the passages.

Each one is marked You or AI. The model is asked to say when a note disagrees with the paper.

N1

👤 You

p. 4

| we mask 15% of the tokens at random

Why 15%? Try 10% and 20% on my runs.

N2

🌟 AI

p. 4

| predict only those masked tokens

Only masked words count toward the loss.

The model

5 · CITE A NOTE

Answers can cite your notes.

Hover [N1] to see who wrote it. Click it, and the paper scrolls to that note's highlight.

N1 · You · p.4

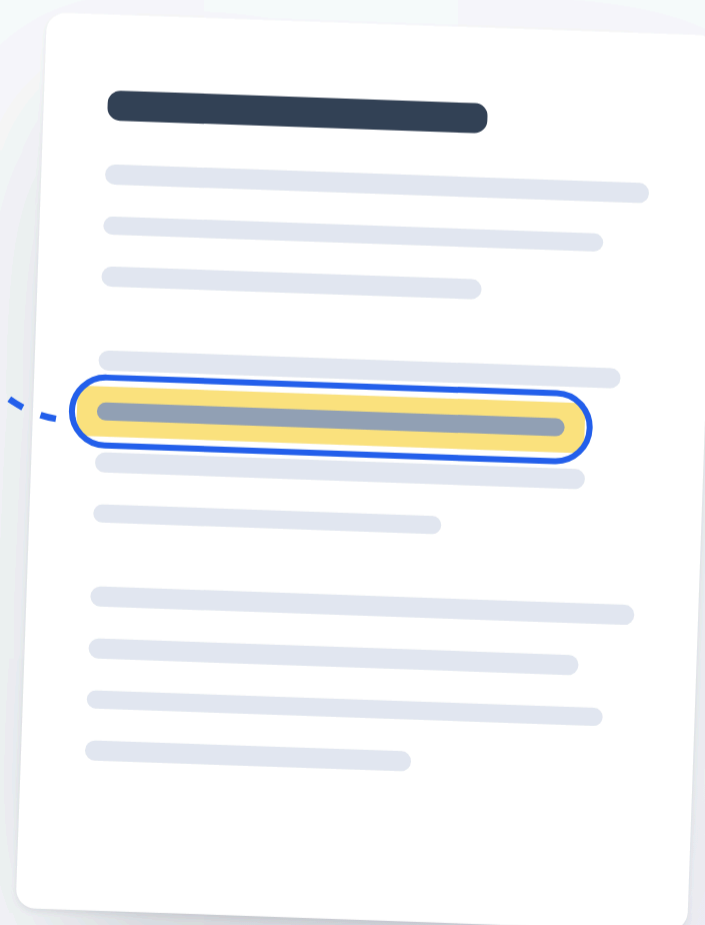

The AI used this note. Click to see it in the paper.

The paper only reports 15% [C1]. Your note plans to try 10% and 20% [N1].

6 • EASY TO READ

Answers keep their lists and bold text.

No stray asterisks. If you leave the reader mid-answer, it still finishes and is saved.

Is every chosen token masked?

No. Of the tokens chosen for masking **[C1]**:

- **80%** become a mask token
- **10%** become a random token
- **10%** stay unchanged
