

Find a paper. **Add it in a click.**

Search by title, DOI or arXiv ID. When a free PDF exists, PaperLab downloads it into your library.

1 • SEARCH

Search by title, DOI or arXiv ID.

Open Find papers in your library or a workspace. An arXiv ID works right away. Titles and DOIs need OpenAlex turned on.

 **Find papers**

 **Upload PDFs**

Find papers

Search by title or identifier. Add downloads a free PDF only: from arXiv, a repository or an open-access publisher.

1810.04805|

Search

A title

Attention Is All You Need

A DOI

10.18653/v1/N19-1423

An arXiv ID

1810.04805

2 · CHECK THE RESULTS

A free PDF, or a link to its page.

PDF means a free copy was found on arXiv, a repository or an open-access publisher. Nothing gets past a paywall.

Dense Passage Retrieval for Open-Domain Question Answering

PDF

Vladimir Karpukhin, Barlas Oğuz et al. · 2020 · EMNLP

3 • ADD

Add it in a click. It's read like an upload.

PaperLab downloads the free PDF and processes it like one you uploaded. Add from a workspace, and the paper joins it.

5 • SIMILAR PAPERS

Reading a paper? See the ones like it.

The reader's Similar tab lists papers suggested by Semantic Scholar. Add them the same way.

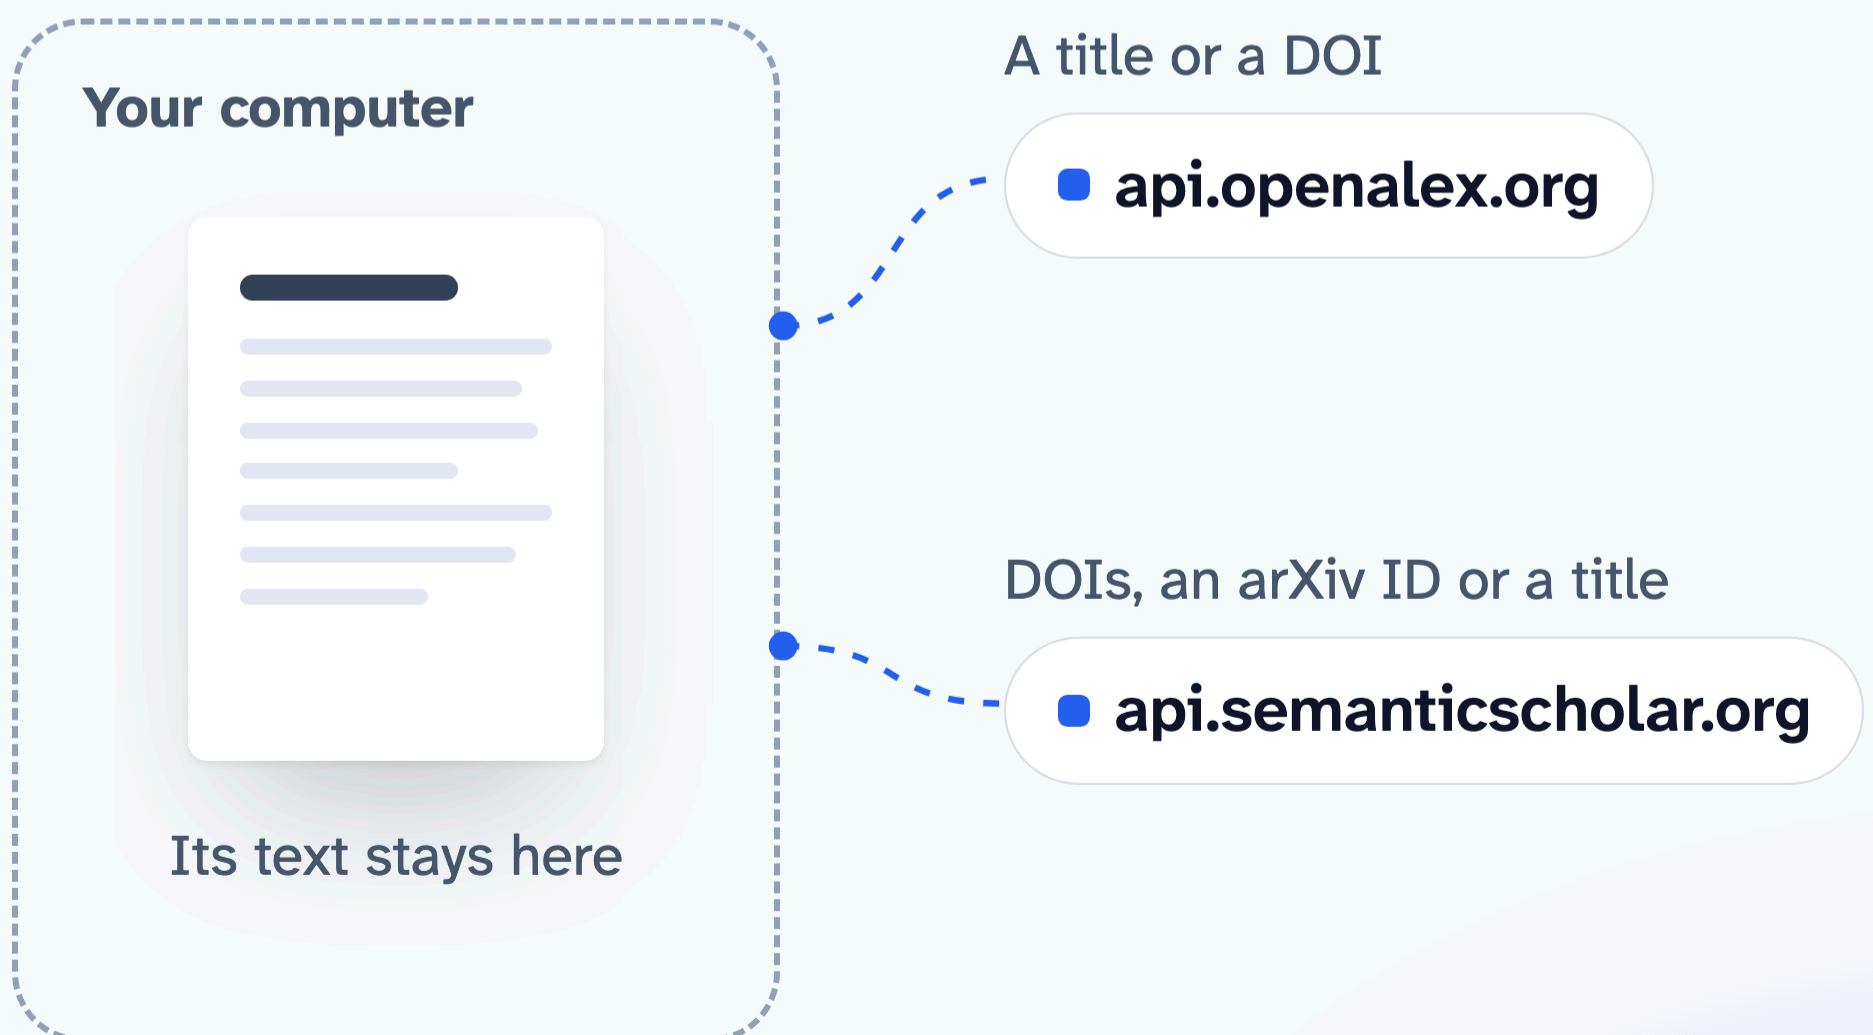

PRIVATE BY DEFAULT

It sends a title or an ID. Never a paper's text.

Find papers sends your search to OpenAlex, and DOIs or arXiv IDs to Semantic Scholar. Similar sends a paper's DOI, or its title.

**Read deeper.
Keep every thought.
Find the next paper.**

PaperLab runs on your own machine. Your PDFs, notes and library stay on your computer.
