

Notes that remember where they came from.

Every note stays pinned to its passage, shows who wrote it, and takes you back to the page.

You

p. 4

| we mask 15% of the tokens at random

Why 15%? Try 10%
and 20% on my runs.

AI

p. 4

| predict only those masked tokens

Only the masked words
count toward the loss.

Swipe →

1 • WRITE A NOTE

Select a passage. Write what you think.

Highlight it in any colour and add a note if you want. It keeps the page and position of its passage.

To train a deep model in both directions,
we mask 15% of the tokens at random
and predict only those masked tokens.

we mask 15% of the tokens at random

Why 15%? Try 10% and 20% on my runs.

Add as number Cancel

Save note

2 • FIND IT AGAIN

Click a note. Land on its passage.

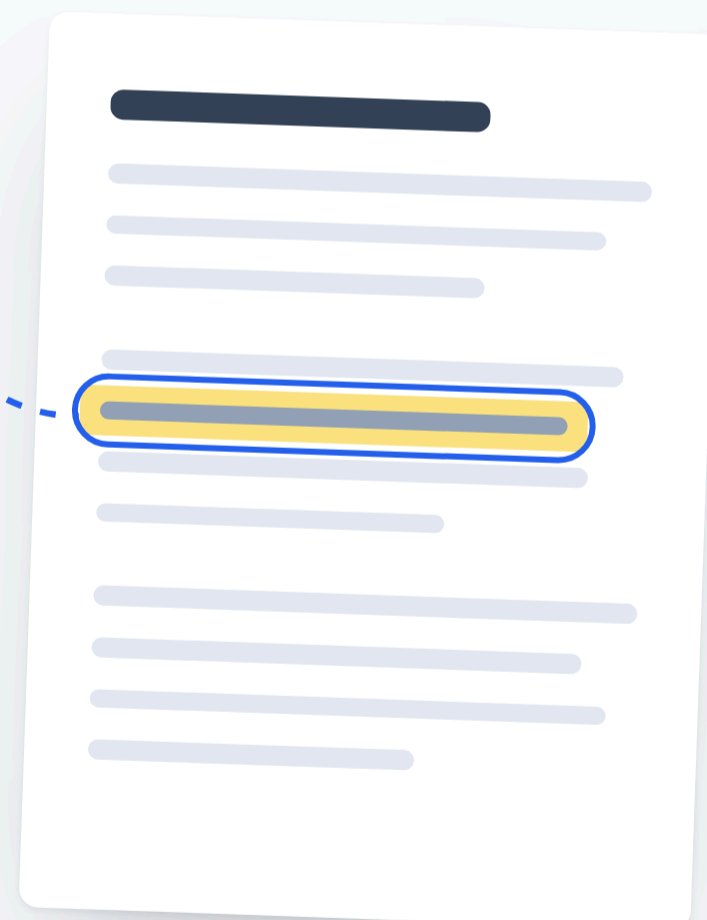

Click its page number or its quote. The reader scrolls to the highlight and outlines it.

 You

we mask 15% of the
tokens at random

BERT paper • p. 4

3 · WHO WROTE IT

Every note says who wrote it.

Notes you save from a chat answer are marked AI. Edit one and it says AI · edited, never You.

 You

p. 4

Why 15%? Try 10% and 20% on my runs.

 AI

p. 4

Only the masked words count toward the loss.

↓ You edit it

 AI · edited

p. 4

Only the masked words count toward the loss. Slower to train?

4 · FILTER THE LIST

Your notes, the AI's, or both.

Turn You or AI off to filter the notes list. Every highlight stays on the paper.

✓ You 2

☆ AI 2

👤 You

p. 4

| we mask 15% of the tokens at random

Why 15%? Try 10% and 20% on my runs.

👤 You

p. 6

| fine-tuning takes at most one hour

Cheap enough to rerun on my data.

5 • EDIT IN PLACE

Hover a highlight. Change its note there.

See, edit, recolour or delete a note right on the page.

To train a deep model in both directions,
we mask 15% of the tokens at random
and predict only those masked tokens.
